A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 10, 2005 has been entered.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 11 and 2-5 are rejected under the judicially created doctrine of double patenting over claim 6 of U. S. Patent No. 6,254,724 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: Claim 6, formulae Z, Z\*, AA and AA\* are substantially the same as the claimed species. The claimed species would have been an obvious variant of species Z, Z\*, AA and/or AA\*.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 11 and 2-5 are rejected under 35 U.S.C. 103(a) as obvious over WO 99/05108 or SELTZER et al (6,254,724).

WO 99/05108 teaches, on pages 57 and 58 in Examples Y\*, Z\*, AA\* and BB\*, or SELTZER et al in columns 26-28, in examples Z, Z\*, AA and AA\* discloses compounds substantially the same as the claimed compound. The claimed compound would have been an obvious variant of compounds Y\*, Z\*, AA\* and BB\* of WO 99/05108 or Z, Z\*, AA and AA\* of SELTZER et al. The difference between the compound of Example 18 of the instant

Art Unit: 1731

Application, and the compounds of WO 99/05108 or SELTZER is that the compound of WO 99/05108 alkylene groups with secondary hydroxyl groups are not analogous to the present straight chain alkylene groups (e. g. ethylene). However, the alternativeness of using alkylene chains containing 1 to 4 carbon atoms interrupted with two oxygen's and not interrupted or interrupted with hydroxyl groups is taught by WO 99/05108, on page 39 and page 8, lines 6-20. Thus, it would have been obvious to the artisan to substitute an alkylene chain interrupted with only two oxygen's for one interrupted by both two oxygen's and two hydroxy groups.

The 132 Declaration filed by Glen T. Cunkle removed the species of SELTZER listed in column 25 and the species of WO 99/05108, listed on page 55. It does not refer to the newly applied species and therefore does not remove WO 99/05108 or SELTZER et al (6,254,724) as references.
